

Locauto Rent Damage Rate Table

The damage definition and quantification has been done according to the following criteria:

- **Car Body:** damages are quantified and updated according to "Wincar", a system commonly acknowledged by the leading insurance companies, and based on the car manufacturers rate tables;
- **Crystals:** damages are quantified and updated according to the price tables of the car manufacturers;
- **Tyres:** damages are quantified and updated according to the price tables of tyre manufacturers.

All the amounts shown below are inclusive of labor, works and accessory materials necessary for the restoration, as well as the waste disposal. They also include the technical stop, calculated on the basis of the days required to repair the car (including eventual ordering time of spare parts) calculated on the basis of the standard daily rental rate.

La determinazione dei danni di meccanica, danni multipli e danni occorsi a parti non indicate nel presente listino

The evaluation of mechanical damage, multiple damage and damage not detailed in this table, is done case by case by the Lessor after examining the damaged car and according to the type of damage; this evaluation also takes into account labor costs, works and accessory materials required to repair the car, as well as the waste disposal. It also includes the technical stop, calculated on the basis of the days needed to repair the car (including eventual ordering time of spare parts) calculated on the basis of the standard daily rental rate.

The damage evaluation of the car body is done through a tool called **Misuratore Locauto Rent a car**, consisting of a plastic card sized 10x5 cm. Damages are classified according to the table below.

Once the damage has been determined, according to the above criteria, the Lessor has the sole discretion to determine when to perform the repair.
